

## REMOTE MONITORING VALUE PROPOSITION

**REDUCE \*RTA RATES IN  
HOME HEALTH**

RTA: RETURN TO ACUTE

**BY IMPLEMENTING A  
REMOTE MONITORING  
PROGRAM**

### Challenge

Most documented reasons for Home-health patients returning to acuity are:

\*No PCP follow up in the first 30 days

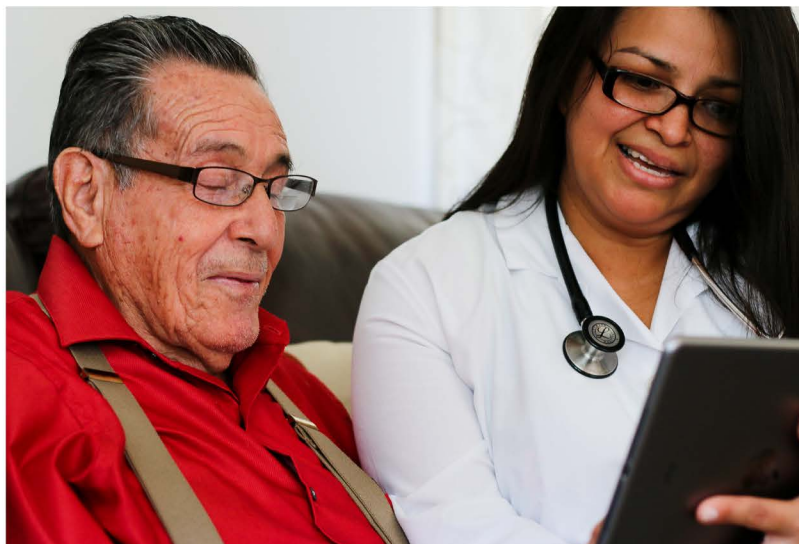

\*Medication errors due to lack of care coordination

### Opportunity

Implement a monitoring program where clinicians have Real-time ability to:

\*Modify/Change/Enhance the Plan of Care

\*Improve outcomes by enhancing the patient experience and reducing costs

# Armored RPM Solution

## MONITORING

Clinical Call Center Monitoring Devices

## ANALYSIS

Visualize, search, and discover patterns

## INTERVENTION

Access to an RN or MD at time of alarm

Our Telemonitoring Program is designed to reduce RTA and monitor long after. Our team brings easy-to-use equipment to your home, installs it for you and shows you how to use it.

Historic and real-time data views, trend graphs, thresholds & notifications and alerts, based on clinical pathways and plan of care geared towards preventing readmission and RTA

Immediate ROI using our telemedicine platform by providing:

- PCP follow up
- MD notification
- Alarm assessments
- Care coordination
- Rx reconciliation
